CAREER OBJECTIVE

Motivated Information Technology student passionate about **web application development** and **data visualization using Power BI**. Adept at building user-centric applications and transforming raw data into actionable insights through interactive dashboards. Eager to contribute to scalable, high-performance solutions while continuously enhancing technical and analytical skills.

EDUCATION

B.Tech in Information Technology

GMR Institute of Technology (GMRIT), Rajam, Andhra Pradesh

2023 – 2027

CGPA: 8.9

Intermediate (MPC)

Srinivasa Junior College, Cheepurupalli, Andhra Pradesh

2021 – 2023

Percentage: 97.2%

Secondary School (SSC)

ZPGH School, Cheepurupalli, Andhra Pradesh

2021

Percentage: 100%

TECHNICAL SKILLS

- **Programming Languages:** Java, Python, JavaScript, C
- **Web Technologies:** HTML5, CSS3, Node.js
- **Databases:** MySQL, MongoDB
- **Data Visualization:** Power BI, MS Excel
- **Core Concepts:** Data Structures, Object-Oriented Programming, DBMS

EXPERIENCE

Full Stack Developer Intern – Sradex Learning Pvt. Ltd. (Virtual)

February 2026 – April 2026

- Completed a **2-month virtual internship** working approximately **1 hour per day** on full-stack development tasks.
- Assisted in developing and improving **web application features** using front-end technologies.
- Worked on **UI components, debugging, and feature implementation** to improve application performance and usability.

PROJECTS

Vision Insight – AI-Based Photo Editing and Analysis System

- Developed an **AI-powered web application** integrating image processing and intelligent editing techniques.
- Implemented **real-time image enhancement** (brightness, contrast, saturation, cropping).
- Built a **background removal module** using a machine learning model for accurate segmentation.
- Designed a **prompt-based editing system** using NLP for automated transformations.
- Integrated an **AI detection model** providing percentage-based classification of AI-generated images.

Sales Analysis Dashboard – Power BI

- Developed an interactive **sales dashboard** to track **total sales, transactions, and average bill value**.
- Created visualizations such as **line charts, bar graphs, and KPI cards** for daily sales analysis.
- Implemented **filters and slicers** (payment mode, customer type) for dynamic data exploration.
- Identified trends in **customer behavior and category-wise sales performance**.

Startup Analysis Dashboard – Power BI

- Designed a **data-driven dashboard** to analyze **startup funding trends and investment patterns**.
- Visualized key metrics like **total funding, average funding, and funding distribution by year**.
- Built interactive charts including **pie charts, bar charts, and ranking tables**.
- Extracted insights on **top-funded startups and investment type distribution**.

CERTIFICATIONS

- Python Programming Certificate – edX
- Power BI Certificate – Topmate
- Full Stack Mastery from HTML to React – L&T
- Java Programming for Beginners – Simplilearn

ACHIEVEMENTS

- Solved more than **200 coding problems** on CodeChef.
- Practicing **Data Structures and Algorithms** on LeetCode and CodeChef.
